and Transport

ESTS - Overview

ESTS - Overview

What is the ESTS?

- A new 3.8 km long, twin pumping main designed to safely carry sewage from the sewage pumping station in Eastside Kingsway roundabout area up to the main trunk sewer at Rosia Parade in the south.
- The route involves a combination of buried pipelines along roads and surface mounted pipelines running inside ex-MOD tunnels (Admiralty North-South and Admiralty East-West tunnels).
- The system consists of twin pipes of 450mm and a 355mm diameter respectively.
- Four additional pumps will be installed to cope with future sewage flows
As part of ESTS – Phase 6

To date – Over 100m of the 875m has been laid in Phase 1 (Eastside)

ESTS - Overview

355mm

450mm

Pumping
Station

ESTS PHASE 4 – Key Details

ESTS - Phase 4

- Divided into 8 smaller stages.
- Total of 808m of dual pipes (355mm & 450mm) for Phase 4.
- From Saluting Battery (exercise park) → Rosia Road → Transport Road down South Pavilion Rd discharging at Rosia Parade.

Contractor = GJBS

£1.88m contract

Entire duration of Phase 4 = 1 year

Start on site = Sat 4th October 2025

Transport Road Section (ESTS Phase 4)

Duration of this phase of works = 12 Weeks

Total length of pipe for this section = 98m

Avg excavation depth 2.4m

Avg trench width 2m

Bus Routes

Impacts of Phase 4 – Transport Road

Parking

Parking will temporarily lost for the duration of the works at;

- 1) Transport Road.
- 2) Parking Bays on Rosia Road (opposite Cumberland Road)
- 3) 5 Parking spaces in front of Bayview and Clock Tower (for temporary bus shelter)

Impacts of Phase 4 – Transport Road

Parking

Due to change in traffic flow direction, parked vehicle orientation needs to be corrected.

On 4th October, temporary parking restrictions will be put in place in these areas to allow for implementation of new traffic flow and allow vehicles to park in the correct direction.

The restrictions in these areas will be for a number of hours on the 4th October and will be removed as soon as all vehicles are cleared.
